Assembly workshop chair

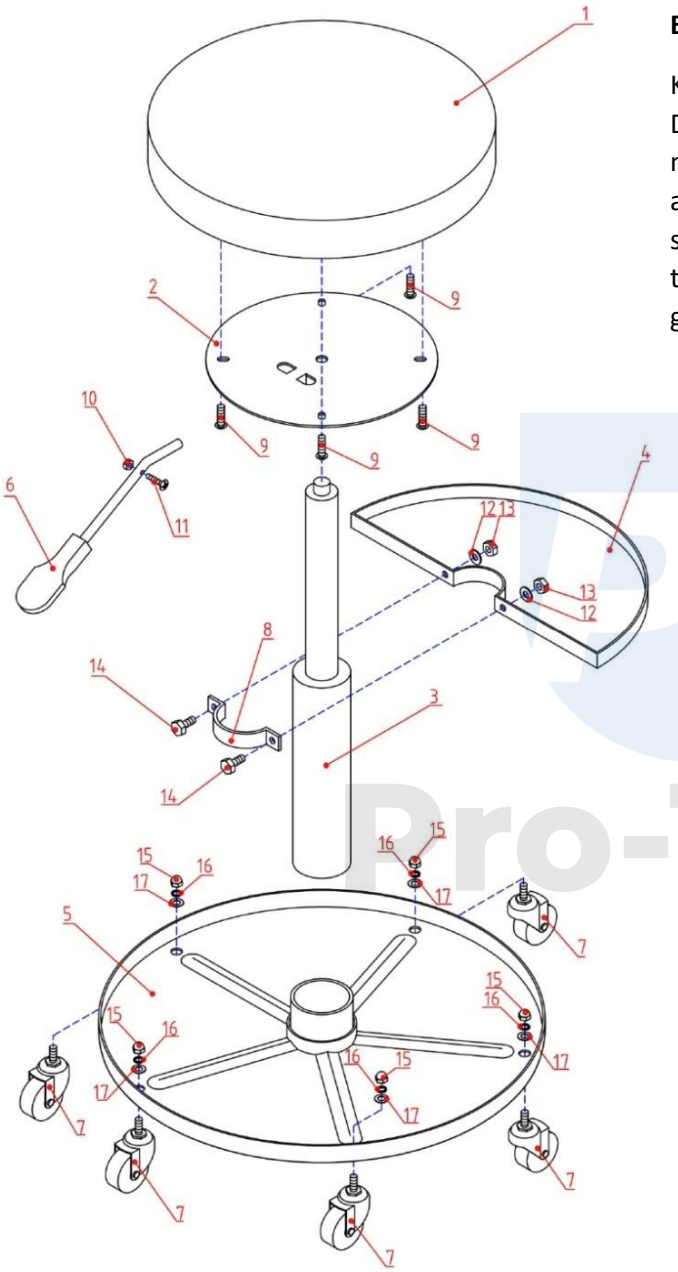

Instructions for use

Translation of the original instructions

Product characteristics

Pneumatic workshop seat with a load capacity of 136 kg. Seat height adjustable by pneumatic lift (+11.5 cm). Stable five-star base on ball-bearing castors. Textile seat upholstery for easy maintenance.

Seat construction

Equipment maintenance

Keep your tools clean. For cleaning tools
Do not use aggressive cleaning agents or thinners. Parts made of plastic should be cleaned with a cloth dampened in a solution of soap and water. Clean and lubricate metal surfaces with a cloth moistened with paraffin oil. When the equipment is not used, it should be preserved with grease and stored in a dry place to prevent corrosion.
