Pro-Tech TOOLS

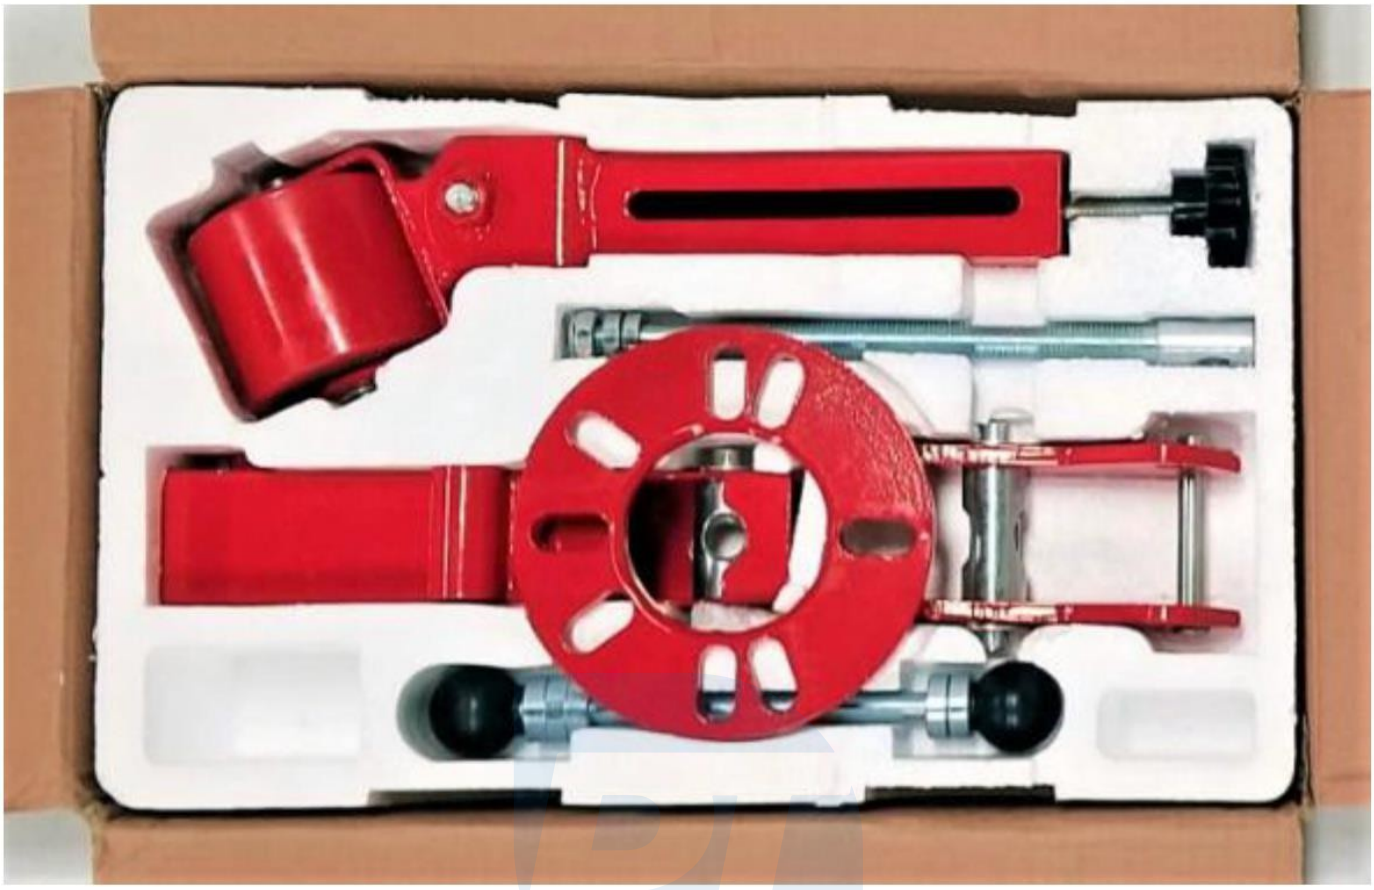

Fender repair kit

Instructions for use

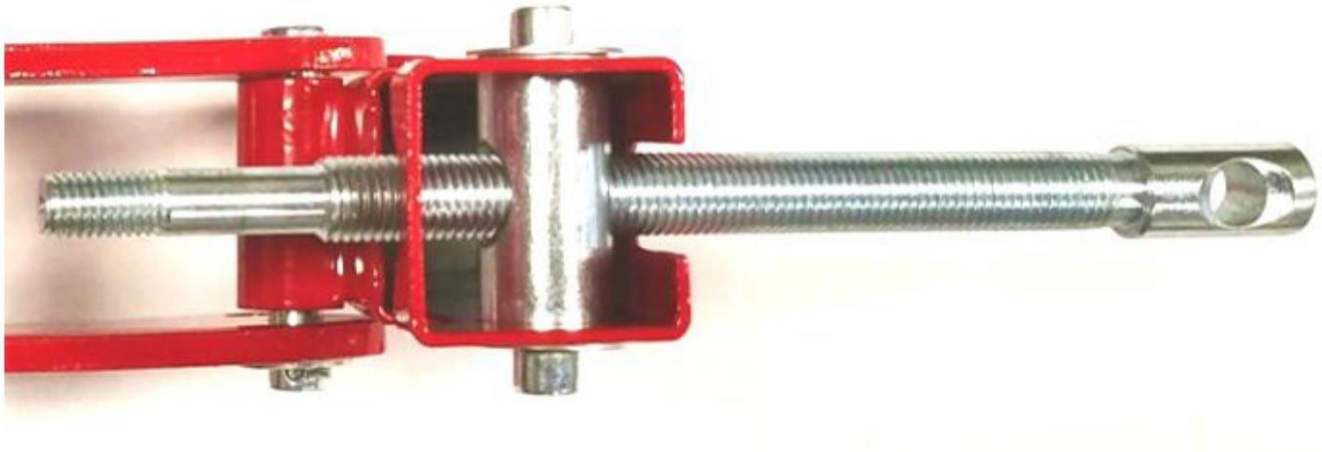

Translation of the original instructions

After opening the package, check if any parts are missing.

Remove the lock nut and main cover from the box.

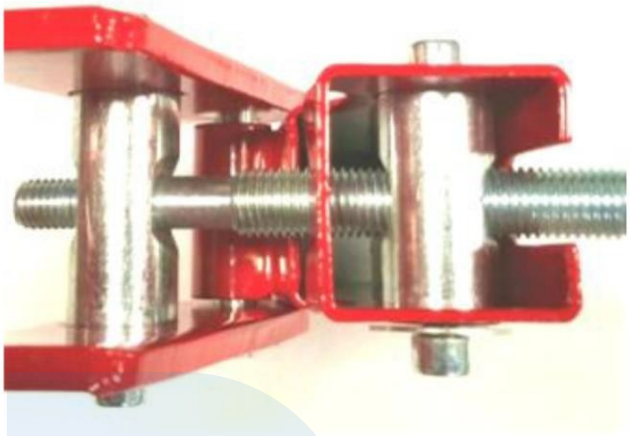

Place washers on both sides of the set screw.

Connect the two parts as shown in the picture.

1. **Fuse nut**
2. **Store 5 pads on the handle to hold them securely**
3. **Send to the main body**
