Pro-Tech TOOLS

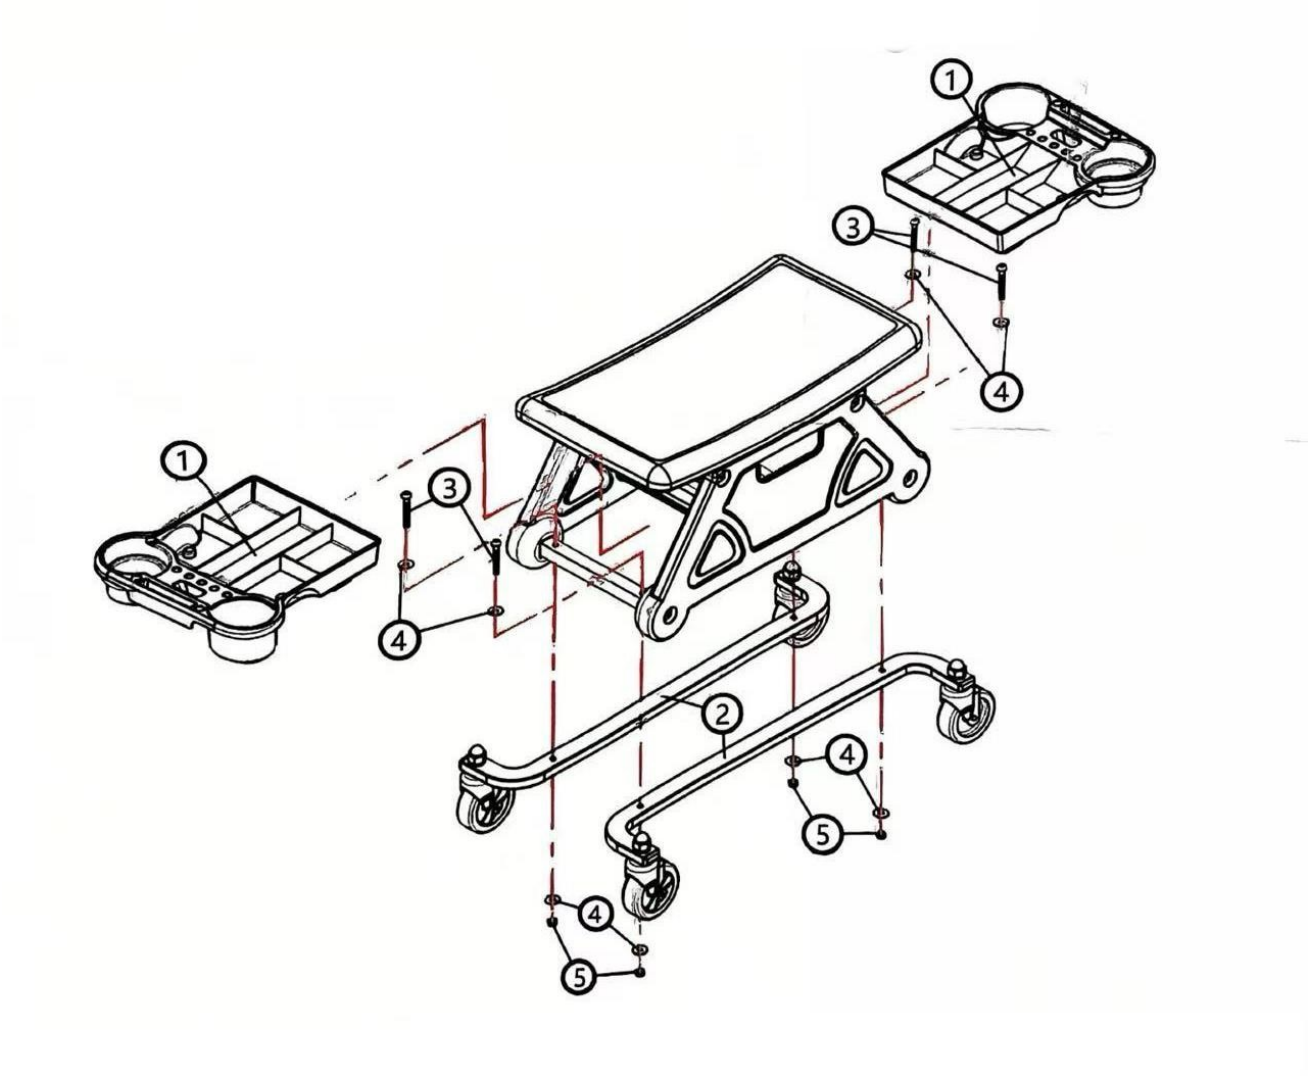

Assembly workshop chair

Instructions for use

1. Purpose of the facility

The fixed-height assembly workshop chair is designed for comfortable seating when working in the workshop. It has a tool storage area under the seat and swivel castors for easy movement.

1 - plastic storage areas

2 - metal support part

3 - screws M6x45 (4pcs)

4 - washers M6 (8pcs)

5 - nuts M6 (4pcs)

Installation procedure:

1. **Fixing the wheels:**
    - Insert the castors into the holes in the legs of the metal frame.
    - Push them all the way , or secure according to the instructions in the package (some models require screwing in).
2. **Installation of the storage :**
    - Place the plastic storage tray between the legs of the frame.
    - Align the holes and screw in using the supplied fasteners.
3. **Mounting the seat cushion:**
    - Place the seat cushion on top of the frame.
    - Screw it through the pre-drilled holes in the frame.

Application:

- Use the chair on flat, firm surfaces.
- The storage area is ideal for storing commonly used tools, screws and small parts while working.

Safety :

- **Maximum load capacity:** do not exceed the production capacity of 140kg!
- **Stability:** only use the chair on a flat surface.
- **Castors:** check them regularly for wear and proper fastening.
- **A chair is not a ladder:** Do not climb on the seat or use the chair as a stepladder.
