Pro-Tech TOOLS

Car Wash Detailing Bucket

Instructions for use

1. Purpose of the device

This product is designed to make the process of washing and detailing vehicles easier. The mobile bucket with wheels makes it easy to move and provides a stable base for washing supplies.

Main features:

- **Mobility:** thanks to the integrated wheels, the bucket can be easily moved around the vehicle during washing, reducing the need for constant lifting and carrying.
- **Stability:** sturdy construction and high-quality wheels ensure the bucket is stable even on uneven surfaces.
- **Versatility: the** bucket is compatible with various types of washing and detailing tools, allowing it to be used extensively for cleaning both the exterior and interior of the vehicle.

Instructions for use:

1. **Preparation:**
    - Make the bucket is clean and free of dirt.
    - Fill the bucket with a suitable cleaning solution as required.
2. **Application:**
    - Thanks to the wheels, you can easily move the bucket around the vehicle during washing.
    - Use the bucket in combination with washing gloves, sponges or brushes to effectively clean the surface of the vehicle.
3. **After use:**
    - Empty the bucket and rinse it thoroughly with clean water.
    - Allow the bucket to air dry before storing.

Safety :

- Do not exceed the maximum capacity of the bucket to prevent damage or tipping.
- When moving the bucket, make sure that the wheels are not blocked by dirt, which could affect its mobility.
- Keep the bucket out of the reach of children, especially if it contains cleaning chemicals.

Following these guidelines will ensure the efficient and safe use of the mobile bucket with wheels when washing and detailing your vehicle.
